11) Why are some mikes better for some applications than others? use examples if you can

12) Explain how you would check for reason you get no sound from TT2 although you have patched TT@ 2 to Ch 2

13) you plug an input into ch one and get no sound, why?

14) what is a balanced line, why do we use balanced lines in CCR

15) You have a casset tape recorder that you want to copy a tape from onto a reel to reel machine. how would you use the strange devices to achieve it.

16) same problem except the other way around, ie you want to record a reel to reel tape on a casset machine

17) How would you add echo to a master tape(rember master tapes are never cut , rerecorded over or any way touched except to make copys from)

If you are intreseted in working as a CCR expert ie learn a little about how to fix things please let me know.
